UNOR INC.
MANAGEMENT DISCUSSION AND ANALYSIS
September 30, 2008

This Management Discussion and Analysis (“MD&A”) has been prepared as of November 19, 2008 and should be read in conjunction with the interim financial statements of the Company for the six months ended September 30, 2008, and the related notes. The Company’s reporting currency is the Canadian dollar and all amounts in this MD&A are expressed in Canadian dollars unless noted otherwise. The Company reports its financial position, results of operations and cash flows in accordance with Canadian generally accepted accounting principles.

1. Forward-Looking Statements

This MD&A contains certain forward-looking statements. These interim statements are based on certain estimates and assumptions and involve risks and uncertainties, including but not limited to: political risks, title risks, commodity price and currency exchange rate risks, operating and environmental hazards encountered in the mineral exploration and development business, general industry and economic conditions, changes in the regulatory requirements affecting the Company’s business, future capital expenditures and the availability and terms of financing. Consequently, actual results and events may vary significantly from those included, contemplated or implied by such statements.

2. Corporate Overview

In 1996, UNOR Inc. (“UNOR” or the “Company”) was incorporated in Ontario with its primary focus on uranium exploration in Nunavut, Canada. Nunavut is the only territory and/or province that has settled its native land claim issues.

In June 2006, Cameco Corporation (“Cameco”) acquired 19.5% of the Company and the companies agreed to a Strategic Alliance Agreement that provides to UNOR ongoing uranium technical knowledge, guidance and exploration opportunities. In September 2006, Cameco and UNOR established a Joint Technical Committee to facilitate consultations between the companies with respect of exploration programs.

Since 2003, the Company has invested \$21 million on its 100% owned Coppermine property out of the total of \$31 million spent in western Nunavut on the systematic exploration and advancement of the Company’s uranium mineral properties.

UNOR is a reporting issuer in Ontario, British Columbia and Alberta and trades on the TSX Venture Exchange under the symbol UNI.

3. Operating Strategy

The Company’s overall mineral exploration strategy is based on aggressively and systematically pursuing the discovery of uranium deposits in Nunavut while maintaining its gold and copper assets in Ontario and in British Columbia.

UNOR INC.
MANAGEMENT DISCUSSION AND ANALYSIS
September 30, 2008

4. Exploration Properties

The Company completed its 2008 Nunavut uranium field season in September and currently, discussions are underway with the Joint Cameco/Unor Technical Committee on the company's 2009 exploration program.

Major highlights of the 2008 field program include:

100% Owned Coppermine Property:

- Intersection (HB-08-60) of a **6.4** metre radioactive interval (58-64.4m) on the western fault boundary of the Hot Creek Graben. Priority assays of samples from the radioactive interval indicate a peak content of **0.105%** U₃O₈ over **0.7** meters. Geological, geophysical and drill data confirm the importance of structure as a secondary control of mineralization.
- Imaging using natural electromagnetic field information indicates a major basement uplift in the centre of the property.
- Ground geophysics discovered a new conductor on claim CM 56 and a northern extension of the Wolf Creek conductor.

Cameco J/V Lac Rouviere Property:

- Discovery of **124** new radioactive boulders (cps range 300-11000) and **27** new bedrock occurrences (cps range in sandstone bedrock 270-1500; cps range in granitic bedrock 700-2400).
- Discovery of a cluster of **16** radioactive fault-rock boulders (Flare occurrence) in the southeastern part of the property, at the contact between the Lady Nye sandstone and the Great Bear granitic basement. Priority assay of sample MS-08-84 from one of the fault-rock boulders shows high U (345 ppm) along with high As (1270 ppm), and high Ni (873 ppm). Both high As and Ni are common in the Athabasca unconformity deposits.
- Continuation of mapping and prospecting of the property, which was started in 2007. Significant progress has been made in the bedrock mapping of the vast till-covered area in the western half of the property.

Airborne Magnetic-Gamma-Ray Survey:

Fugro Airborne completed a detailed (150 m flight line spacing) airborne magnetic-gamma-ray spectrometer survey covering the Cameco J/V Lac Rouviere Area – 16,230 line km), the northern parts of the company owned Coppermine property (1,490 line km) and the claims of the UNAD-JV (1,810 line km). The processing of the data is continuing and it is expected that results will be available by December 2008.

UNOR INC.
MANAGEMENT DISCUSSION AND ANALYSIS
September 30, 2008

Statistics for field work completed during the 2008 season include the following:

- **9** drill holes (uranium) for a total of **1327** meters
- **100** drill core samples submitted for assay and PIMA studies
- **838** soil samples collected in **8** target areas for Soil Gas Hydrocarbon predictive geochemistry analysis
- **283** surface rock samples collected for assay
- **140** surface rock samples collected for mineralogical and PIMA studies
- **160.75** kilometers of ground geophysics on the Coppermine project
- **110.7** kilometers of ground geophysics on the Lac Rouviere JV
- Airborne gamma-ray/magnetometer survey: Lac Rouviere JV – **16,227 km**; Unor (Coppermine Block) – **1,492 km**; UNOR JV – **1,811 km**

Other UNOR Properties:

In October 2008, the April 2005 Option Agreement between Laurion Mineral Exploration Inc. and the Company was terminated with the Company retaining its 100% ownership of the five gold leases near Timmins, Ontario.

UNOR has a 5% net smelter royalty interest on 4,000 acres at the old Similkameen copper porphyry mine 30 kilometres south of Princeton, British Columbia which is currently under development by Copper Mountain Mining Corp. Also, the Company owns four mineral Crown Grants located in the Princeton area that was formerly part of the Camsell property. The Crown Grants cover the historical Independence Mine workings that exploited high grade copper in a breccia pipe. The pipe is part of a much larger porphyry copper-gold deposit that has not been explored at depth. The surface mineralization is generally low grade and the few holes drilled in the past were targeted on specific structures and did not test depths greater than 400 feet.

UNOR INC.
MANAGEMENT DISCUSSION AND ANALYSIS
September 30, 2008

5. Liquidity and Capital Resources

The Company has no operating revenues and relies primarily on equity financings as well as the exercise of warrants and options to fund its exploration and administrative costs.

The Company's operations consist of the exploration and evaluation of its various properties, a process that is ongoing, and is dependent on many factors some of which are beyond the Company's control. The Company maintains a policy of reviewing its working capital requirements on a continuous basis and is mindful of its property and administrative commitments.

At September 30, 2008, the Company's working capital totalled \$468,504 compared to \$3,967,142 at March 31, 2008. Cash balances were \$826,004 compared with \$4,017,083 at March 31, 2008. These decreases are primarily due to exploration costs of \$3,499,498. The Company's cash resources will fund the Company's planned activities until 2009.

Selected Annual Information

	2008	Year ending March 31, 2007	2006
	\$	\$	\$
Total revenues	143,105	218,641	65,833
Net Income (loss)	(116,120)	(614,934)	(1,036,748)
Basic net Income (loss) per share	(0.00)	(0.01)	(0.01)
Diluted net Income (loss) per share	(0.00)	(0.01)	(0.01)
Total assets	32,933,222	29,531,960	18,560,769

6. Results of Operations

During the six months ended September 30, 2008, the Company recorded an operating loss before Stock Option Compensation of \$353,140 compared to \$327,853 for the six months ended September 30, 2007. This increase is primarily due to a charge for the tax on flow-through funds raised in the prior calendar year and not spent by February 28 of the current calendar year of \$46,386.

UNOR INC.
MANAGEMENT DISCUSSION AND ANALYSIS

7.. Outstanding Share Data

As of November 19, 2008, the Company has issued one class of common shares and a total of 141,982,405 shares are outstanding. The Company has 9,421,120 share purchase warrants outstanding. Each warrant entitles the holder to purchase one common share at prices of \$0.25 to \$0.45 per share until March 1, 2010. Stock options outstanding as of November 19, 2008 total 7,890,447 and are exercisable for common shares at prices ranging from \$0.22 per share to \$ 0.67 per share

8. Commitments

- (a) The Company is party to certain management contracts. Minimum management contract commitments remaining under the agreements are approximately \$163,000, all payable within one year.

UNOR INC.
MANAGEMENT DISCUSSION AND ANALYSIS
September 30, 2008

(b) The Company is committed to minimum rentals under a long-term lease for premises, which expires May 31, 2012. Minimum rental commitments remaining under this lease approximate \$125,000 including \$34,000 due within one year. Minimum rental commitments for successive fiscal years approximate:

<u>Year</u>	<u>Amount</u>
	\$
2009	17,000
2010	34,000
2011	34,000
2012	34,000
2013	6,000
	<u>125,000</u>

9.Changes in Accounting Policies

On January 1, 2008, the CICA issued three new accounting standards: Capital Disclosures (Handbook Section 1535), Financial Instruments – Disclosures (Handbook Section 3862), and Financial Instruments – Presentation (Handbook Section 3863). These new standards became effective for the Company on April 1, 2008.

Capital Disclosures

Handbook Section 1535 specifies the disclosure of (i) an entity's objectives, policies and processes for managing capital; (ii) quantitative data about what the entity regards as capital; (iii) whether the entity has complied with any capital requirements; and (iv) if it has not complied, the consequences of such noncompliance. The Company has included disclosures recommended by the new Handbook section in note 3 to its financial statements.

Financial Instruments

Handbook Sections 3862 and 3863 replace Handbook Section 3861, Financial Instruments – Disclosure and Presentation, revising and enhancing its disclosure requirements, and carrying forward unchanged its presentation requirements. These new sections place increased emphasis on disclosures about the nature and extent of risks arising from financial instruments and how the entity manages those risks. The Company has included disclosures recommended by the new Handbook sections in note 4 to its financial statements.

UNOR INC.
MANAGEMENT DISCUSSION AND ANALYSIS
September 30, 2008

10. Financial Instruments

Fair value

Canadian generally accepted accounting principles require that the Company disclose information about the fair value of its financial assets and liabilities. Fair value estimates are made at the balance sheet date, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties in significant matters of judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect these estimates.

The carrying amounts for cash and cash equivalents, amounts receivable, GST receivable and accounts payable and accruals on the balance sheet approximate fair value because of the limited term of the instruments.

Commodity Price Risk

The ability of the Company to develop its properties and the future profitability of the Company is directly related to the market price of certain minerals.

11. Litigation

The Company is not involved in any outstanding litigation.

12. Off Balance Sheet Arrangements

The Company has no off balance sheet arrangements.

13. Related Party Transactions

The Company had no related party transactions except in the normal course of operations that were measured at the exchange amount which is the amount of consideration established and agreed to by the related parties.

Cameco currently holds a 19.5% interest in the Company. Under the terms of a strategic alliance agreement dated June 19, 2006, Cameco has the right to maintain this interest through future participation in cash and non-cash share offerings of the Company as well as share issuances on the conversion of convertible instruments. Cameco can exercise this right as long as at the time of the offering it holds a minimum of 16% of the issued and outstanding shares of the Company. Cameco is also entitled to nominate one individual for election to the board of directors of the Company as long as it holds not less than 10% of the issued and outstanding shares of the Company.

14. Directors and Officers Compensation

During the six months ended September 30, 2008 the Company paid \$28,750 to directors of the Company and \$207,775 to officers of the Company as remuneration for services provided.

UNOR INC.
MANAGEMENT DISCUSSION AND ANALYSIS
September 30, 2008

15. Disclosure Controls and Procedures and Internal Control over Financial Reporting

The Company has established and is maintaining disclosure controls and procedures. These provide reasonable assurance that material information relating to the Company is disclosed in annual filings, interim filings or other reports and is recorded, processed, summarized and reported within the time periods as required by securities regulations.

Management has evaluated the effectiveness of the Company's disclosure controls and procedures and believes that they are sufficient to provide reasonable assurance that the Company's disclosures are compliant with securities regulations.

The Company has established and is maintaining internal control over financial reporting to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with Generally Accepted Accounting Practices.

No changes in the Company's internal control over financial reporting has occurred that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

17. Risks & Uncertainties

Exploration

The Company's exploration projects are subject to conditions beyond its control that can affect the carrying costs and development costs for varying lengths of time. Such conditions include environmental hazards, unusual or unexpected geological formations or pressures and periodic interruptions due to inclement or hazardous weather conditions. Such risks could result in damage to, or destruction of, mineral properties or facilities, personal injury, environmental damage, delays in exploration programs, monetary losses and possible legal liability. Mineral exploration is highly speculative in nature, involves many risks and frequently is non-productive. There is no assurance that exploration efforts will be successful. Success in establishing reserves is a result of a number of factors, including the quality of management, the Company's level of geological and technical expertise, the quality of land holdings, the availability of suitable contractors, and other factors. Through high standards and continuous improvement the Company works to reduce these risks and maintains insurance to cover normal business risks.

If mineralization is discovered, it may take several years in the initial phases of drilling until production is possible, during which time the economic feasibility of production may change. Substantial expenditures are required to establish proven and probable reserves through drilling, to determine the optimal metallurgical process to extract the metals from the ore and to construct mining and processing facilities. Because of these uncertainties, no assurance can be given that exploration programs will result in the establishment of resources or reserves. Whether a resource deposit will ultimately be commercially viable depends on a number of factors, including the particular attributes of

UNOR INC.
MANAGEMENT DISCUSSION AND ANALYSIS
September 30, 2008

the deposit such as the deposit's size, financing costs and the prevailing prices for the applicable resource. Also of key importance are government regulations, including those relating to prices, taxes, royalties, land tenure, land use and environmental protection.

Financing

In the absence of cash flow from operations the Company relies on the capital markets to fund operations. Although the Company has been successful in the past in obtaining financing through the sale of equity securities, there can be no assurance that additional funding will be available, or available under terms favourable to the Company. Failure to obtain such additional finance could result in delay or the indefinite postponement of further exploration and the development of the Company's properties.

Licenses and Permits, Laws and Regulations

The Company's exploration activities require permits from various government authorities, and are subject to extensive federal provincial and local laws and regulations governing prospecting, exploration, development, production, exports, taxes, labour standards, occupational health and safety, mine safety and other matters. Such laws and regulations are subject to change, can become stringent and compliance can therefore become more costly. The Company relies on the expertise and commitment of its management team, their advisors, its employees and contractors to ensure compliance with current laws and fosters a climate of open communication and co-operation with regulatory bodies.

The Company believes that it holds all necessary licenses and permits under applicable laws and regulations and believes it is presently complying in all material respects with the terms of such licenses and permits. However, such licenses and permits are subject to change in various circumstances. There can be no guarantee that the Company will be able to maintain or obtain all necessary licenses and permits that may be required to explore and develop its properties, commence construction or operation of mining facilities or to maintain continued operations.

Environmental, Health and Safety

The Company's activities are subject to extensive federal, provincial and local laws and regulations governing environmental protection and employee health and safety. Environmental legislation is evolving in a manner that is creating stricter standards, where enforcement, fines and penalties for non-compliance are more stringent. Environmental assessments of proposed projects carry a heightened degree of responsibility for companies and directors, officers and employees. The company is also subject to various reclamation-related conditions imposed under federal or provincial rules and permits, and there can be no assurance that they will not change in the future in a manner that could have a material effect on the Company's financial condition, liquidity or results of operations.

UNOR INC.
MANAGEMENT DISCUSSION AND ANALYSIS
September 30, 2008

18. Subsequent Events

On November 13, 2008 the Company issued 2,200,000 flow-through common shares pursuant to a non-brokered private placement to raise gross proceeds of \$110,000.

CERTIFICATION OF INTERIM FILINGS

I, **George P. Bell, the Chief Executive Officer of Unor Inc.**, certify the following:

1. I have reviewed the interim financial statements and MD&A (together the interim filings) of Unor Inc. (the issuer) for the interim period ending September 30, 2008;
2. Based on my knowledge, having exercised reasonable diligence, the interim filings do not contain any untrue statement of a material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made, for the period covered by the interim filings; and
3. Based on my knowledge, having exercised reasonable diligence, the interim financial statements together with the other financial information included in the interim filings fairly present in all material respects the financial condition, results of operations and cash flows of the issuer, as of the date and for the periods presented in the interim filings.

Date: November 19, 2008

(Signed) "*George P. Bell*"

President and CEO

NOTE TO READER

In contrast to the certificate required under Multilateral Instrument 52-109 Certification of Disclosure in Issuers' Annual and Interim Filings (MI 52-109), this Venture Issuer Basic Certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures (DC&P) and internal control over financial reporting (ICFR), as defined in MI 52-109. In particular, the certifying officers filing this certificate are not making any representations relating to the establishment and maintenance of:

- i) Controls and other procedures designed to provide reasonable assurances that information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation; and
- ii) a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the issuer's GAAP.

The issuer's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in this certificate.

Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost effective basis DC&P and ICFR as defined in MI52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

CERTIFICATION OF INTERIM FILINGS

I, **Thomas P. Devlin, the Chief Financial Officer of Unor Inc.**, certify the following:

1. I have reviewed the interim financial statements and MD&A (together the interim filings) of Unor Inc. (the issuer) for the interim period ending September 30, 2008;
2. Based on my knowledge, having exercised reasonable diligence, the interim filings do not contain any untrue statement of a material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it was made, for the period covered by the interim filings; and
3. Based on my knowledge, having exercised reasonable diligence, the interim financial statements together with the other financial information included in the interim filings fairly present in all material respects the financial condition, results of operations and cash flows of the issuer, as of the date and for the periods presented in the interim filings.

Date: November 19, 2008

(Signed) "*Thomas P. Devlin*"

Secretary, Controller and CFO

NOTE TO READER

In contrast to the certificate required under Multilateral Instrument 52-109 Certification of Disclosure in Issuers' Annual and Interim Filings (MI 52-109), this Venture Issuer Basic Certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures (DC&P) and internal control over financial reporting (ICFR), as defined in MI 52-109. In particular, the certifying officers filing this certificate are not making any representations relating to the establishment and maintenance of:

- i) Controls and other procedures designed to provide reasonable assurances that information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarized and reported within the time periods specified in securities legislation; and
- ii) a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with the issuer's GAAP.

The issuer's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in this certificate.

Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost effective basis DC&P and ICFR as defined in MI52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

UNOR INC.
(A Development Stage Company)
Notes to Interim Unaudited Consolidated Financial Statements
September 30, 2008

1. BASIS OF PRESENTATION

The accompanying unaudited interim consolidated financial statements of the Company have been prepared by, and are the responsibility of, the Company's management.

The Company's independent auditor has not performed a review of these interim consolidated financial statements in accordance with standards established by the Canadian Institute of Chartered Accountants for a review of interim financial statements by an auditor.

These interim consolidated financial statements are prepared in accordance with Canadian generally accepted accounting principles ("GAAP") and follow the same accounting policies and methods of application as the audited consolidated financial statements for the year ended March 31, 2008, except as noted below. They do not include all of the information and disclosures required by Canadian GAAP for annual consolidated financial statements. In the opinion of management, all adjustments considered necessary for fair presentation have been included in these interim consolidated financial statements. Operating results for the period ended September 30, 2008 are not necessarily indicative of the results that may be expected for the full year ended March 31, 2009. For further information, see the Company's consolidated financial statements including the notes thereto for the year ended March 31, 2008.

Change in accounting policies

On April 1, 2008, the Company adopted the following new accounting standards: Capital Disclosures (Handbook Section 1535), Financial Instruments – Disclosures (Handbook Section 3862), and Financial Instruments – Presentation (Handbook Section 3863). These new standards resulted in no changes to amounts previously reported.

Capital Disclosures

Handbook Section 1535 specifies the disclosure of (i) an entity's objectives, policies and processes for managing capital; (ii) quantitative data about what the entity regards as capital; (iii) whether the entity has complied with any capital requirements; and (iv) if it has not complied, the consequences of such noncompliance. The Company has included disclosures recommended by the new Handbook section in note 3 to these financial statements.

Financial Instruments

Handbook Sections 3862 and 3863 replace Handbook Section 3861, Financial Instruments – Disclosure and Presentation, revising and enhancing its disclosure requirements, and carrying forward unchanged its presentation requirements. These new sections place increased emphasis on disclosures about the nature and extent of risks arising from financial instruments and how the entity manages those risks. The Company has included disclosures recommended by the new Handbook sections in note 4 to these financial statements.

2. NATURE OF OPERATIONS AND GOING CONCERN

Unor Inc. (the "Company") is a development stage company as defined by the Canadian Institute of Chartered Accountants (the "CICA") Accounting Guideline 11 and currently has interests in exploration and development properties in Canada. Substantially all of the Company's efforts are devoted to financing and developing these properties. There has been no determination whether the Company's interests in mineral properties contain mineral reserves which are economically recoverable.

2. NATURE OF OPERATIONS AND GOING CONCERN (continued)

The business of exploring for minerals involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. The recoverability of the carrying value of exploration properties and the Company's continued existence is dependent upon the preservation of its interest in the underlying properties, the discovery of economically recoverable reserves, the achievement of profitable operations, or the ability of the Company to raise alternative financing, if necessary, or alternatively upon the Company's ability to dispose of its interests on an advantageous basis. Changes in future conditions could require material write downs of the carrying values.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements and non-compliance with regulatory requirements.

These interim consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles applicable to a going concern. Accordingly, they do not give effect to adjustments that would be necessary should the Company be unable to continue as a going concern and therefore be required to realize its assets and liquidate its liabilities and commitments in other than the normal course of business and at amounts different from those in the accompanying interim consolidated financial statements.

The Company has a need for equity capital and financing in order to explore and develop its properties and for working capital requirements. Because of limited working capital and continuing operating losses, the Company's continuance as a going concern is dependent upon its ability to obtain adequate financing and to reach profitable levels of operation. It is not possible to predict whether financing efforts will be successful or if the Company will attain profitable levels of operations.

3. CAPITAL MANAGEMENT

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition, exploration and development of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

Several properties in which the Company currently has an interest are in the exploration stage; as such the Company is dependent on external financing to fund its activities. In order to carry out the planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

There were no changes in the Company's approach to capital management during the period ended September 30, 2008. The Company is not subject to externally imposed capital requirements.

UNOR INC.
(A Development Stage Company)
Notes to Interim Unaudited Consolidated Financial Statements
September 30, 2008

4. FINANCIAL RISK FACTORS

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk

The Company's credit risk is primarily attributable to short-term investments and receivables included in other assets. The Company has no significant concentration of credit risk arising from operations. Cash and cash equivalents consist of bank deposits which have been invested with or purchased from reputable financial institutions, from which management believes the risk of loss to be remote.

Liquidity risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. As at September 30, 2008, the Company had a cash balance of \$826,004 (March 31, 2008 - \$4,017,083) to settle current liabilities of \$486,493 (March 31, 2008 - \$93,089). All of the Company's financial liabilities have contractual maturities of less than 30 days and are subject to normal trade terms.

Market risk

(a) Interest rate risk

The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by its banking institutions. The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks.

(b) Foreign currency risk

The Company's functional currency is the Canadian dollar and major purchases are transacted in Canadian dollars. From time to time, the Company funds certain operations, exploration and administrative expenses in US dollars on a cash call basis using US dollar currency converted from its Canadian dollar bank accounts held in Canada. Management believes the foreign exchange risk derived from currency conversions is negligible and therefore does not hedge its foreign exchange risk.

(c) Price risk

The Company is exposed to price risk with respect to commodity prices. Changes in commodity prices will impact the economics of development of the Company's mineral properties. The Company closely monitors commodity prices to determine the appropriate course of action to be taken by the Company.

Sensitivity analysis

The Company has designated its cash and cash equivalents as held-for-trading, which are measured at fair value. GST receivable is classified as loans and receivables, which are measured at amortized cost. Accounts payable and accrued liabilities are classified as other financial liabilities, which are measured at amortized cost.

As at September 30, 2008, the carrying and fair value amounts of the Company's financial instruments are the same.

The Company does not hold significant balances in foreign currencies to give rise to exposure to foreign exchange risk.

Price risk is remote since the Company is not a revenue producing entity.

(a) ASIAK RIVER, NUNAVUT

The Company held a 100% interest in 90 mineral claims covering 221,707 acres in the Asiak River area of Nunavut. During the 2007 exploration season the Company surveyed 16 of these claims to convert to leases, 40 claims were allowed to lapse and 34 claims will lapse on October 14, 2008. The sixteen remaining leases covering 41,320 acres are subject to a 1% net smelter royalty and/or a 1% gross diamond royalty subject to a combined maximum with Coppermine and East Block of \$10,000,000.

(b) COPPERMINE RIVER, NUNAVUT

The Company holds a 100% interest in 103 mineral leases and 16 mineral claims covering approximately 275,000 acres in the Coppermine River area of Nunavut. These claims and leases are subject to a 1% net smelter royalty and/or a 1% gross diamond royalty subject to a combined maximum with Asiak and East block of \$10,000,000.

(c) EAST BLOCK, NUNAVUT

The Company held a 100% interest in 9 mineral leases and 7 mineral claims covering approximately 35,000 acres in the East Block area of Nunavut. The 7 mineral claims covering approximately 18,000 acres were allowed to lapse on July 28, 2008. The leases are subject to a 1% net smelter royalty and/or a 1% gross diamond royalty subject to a combined maximum with Asiak and Coppermine of \$10,000,000.

UNOR INC.
(A Development Stage Company)
Notes to Interim Unaudited Consolidated Financial Statements
September 30, 2008

6. INTEREST IN MINERAL PROPERTIES (continued)

(d) **UNAD JV, NUNAVUT**

Pursuant to agreements dated September 30, 2006 the Company holds a 50% interest in 42 mineral claims covering 91,896 acres in Coppermine River area of Nunavut.

(e) **LAC ROUVIERE PROPERTY, NUNAVUT**

On October 23, 2006 the Company entered into an option agreement with Cameco Corporation ("Cameco") on 206 uranium mineral claims held by Cameco covering approximately 521,500 acres in western Nunavut which adjoin the northwest corner of the Company's wholly owned Coppermine River claim block.

In order to earn a 60% interest in the property, the Company must incur exploration and development expenditures of \$3.0 million by March 31, 2010, of which a minimum of \$2.0 million must be incurred on or before June 30, 2008. The parties will establish a joint venture on the date the Company has exercised its earn-in right of 60%.

The Company will be the operator of the joint venture.

Cameco has the right within 90 days after the joint venture has either operated for two years or incurred \$3.0 million of expenditures on the property to earn back 15% by investing an additional \$3.0 million to increase its interest to 55% and reduce the Company's interest to 45%.

(f) **BAFFIN ISLAND, NUNAVUT**

On February 5, 2007, the Company entered into a joint venture agreement with Cameco to establish a joint venture to explore for uranium on 27 prospecting permits currently held by Cameco covering 1,588,000 acres on Baffin Island, Nunavut, Canada.

The Company will be the operator of the joint venture.

The initial participating interest of the parties will be Cameco - 51% and the Company - 49%. Cameco has the right, exercisable within 90 days after the joint venture has either operated for four years or incurred \$6.0 million of expenditures on the property, to increase its interest in the joint venture to 65% and reduce the Company's interest to 35% by committing to incur an additional \$6.0 million on exploration and development of the property during a two-year period following the date on which Cameco makes such an election.

(g) **ONTARIO GOLD PROPERTIES**

In October 2008, the April 2005 Option Agreement between Laurion Mineral Exploration Inc. and the Company was terminated with the Company retaining its 100% ownership of the five gold leases near Timmins, Ontario.

(h) **B.C. PROPERTIES**

The Company holds a 100% interest in four Crown grants in the Camsell and Similkameen area of British Columbia and a 5% net smelter royalty interest on certain parts of the Similkameen Copper Mine.

7. CAPITAL STOCK (continued)

Options

The Company's Stock Option Plan (the "Plan") provides for the granting of stock options to directors, officers, employees and consultants of the Company. Share options are granted for a term not to exceed five years at exercise prices not less than the closing sale price of the shares on the Exchange on the trading day immediately preceding the date options are granted, and are not transferrable. The plan is administered by the Board of Directors, which determines individual eligibility under the Plan, number of shares reserved for optioning to each individual (not to exceed 5% of issued and outstanding shares to any one individual) and the vesting period. The maximum number of shares of the Company that are issuable pursuant to the Plan is limited to 10% of the issued shares.

Options to purchase common share outstanding at September 30, 2008 carry exercise prices and remaining terms to maturity as follows:

Number of Options	Options Exercisable	Exercise Price	Expiry Date
#	#	\$	
877,947	877,947	0.385	10-Mar-09

8. CONTRIBUTED SURPLUS

Contributed surplus transactions for the six months ended September 30, 2008 were as follows:

Balance March 31, 2008	\$3,643,428
Employee stock-based compensation	28,710
Non employee stock-based compensation	5,408
Balance September 30, 2008	<u>\$3,677,546</u>

UNOR INC.
(A Development Stage Company)
Notes to Interim Unaudited Consolidated Financial Statements
September 30, 2008

9. FINANCIAL INSTRUMENTS

Fair value

Canadian generally accepted accounting principles require that the Company disclose information about the fair value of its financial assets and liabilities. Fair value estimates are made at the balance sheet date, based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties in significant matters of judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect these estimates.

The carrying amounts for cash and equivalents, amounts receivable, GST receivable and accounts payable and accruals on the balance sheet approximate fair value because of the limited term of the instruments.

Commodity Price Risk

The ability of the Company to develop its properties and the future profitability of the Company is directly related to the market price of certain minerals.

10. COMMITMENTS

- (a) The Company is party to certain management contracts. Minimum management contract commitments remaining under the agreements are approximately \$163,000, all payable within one year.
- (b) Pursuant to the issuance of 12,885,714 flow-through shares in October and December 2007 the Company renounced \$3,650,000 of qualified exploration expenditures with an effective date of December 31, 2007. As of September 30, 2008, the Company has met this commitments.
- (c) The Company is committed to minimum rentals under a long-term lease for premises, which expires May 31, 2012. Minimum rental commitments remaining under this lease approximate \$125,000 including \$34,000 due within 12 months. Minimum rental commitments for successive years approximate:

<u>Year ended March 31</u>	<u>Amount</u>
	\$
2009	17,000
2010	34,000
2011	34,000
2012	34,000

11. RELATED PARTY TRANSACTIONS

Cameco currently holds a 19.5% interest in the Company. Under the terms of a strategic alliance agreement dated June 19, 2006, Cameco has the right to maintain this interest through future participation in cash and non-cash share offerings of the Company as well as share issuances on the conversion of convertible instruments. Cameco can exercise this right as long as at the time of the offering it holds a minimum of 16% of the issued and outstanding shares of the Company. Cameco is also entitled to nominate one individual for election to the board of directors of the Company as long as it holds not less than 10% of the issued and outstanding shares of the Company.

UNOR INC.
